Working Together, Saving lives

Who are we?

A non-profit community-based humanitarian organization

We have been operating since 2015 officially, and have been operating since 2014 Voluntarily

Our priority is to provide service to every affected person

We care about communities affected by conflict and war
We care about children affected by armed conflicts.

We are concerned about women and their health and health of the fetus coming to life.

We work in developing community capacity.

Our mission is to convey our noble message based on international humanitarian standards.

Our vision is to ensure that every person in Yemen has access to life’s most basic needs.

Our mission is to be committed to contribute in attaining the sustainable human development goals and realization of the vision of peace and welfare through sustainable and effective development project.

2017-2018

Sana’a Gov

2 Districts

Safa’an
Manakha

3,700+ Children
7,300+ Awareness Sessions

130 CHVs

1,270+ PLWs
Challenges

- Short duration of implemented activities.
- Shortage of drugs & Hygiene kits.
- High demand of health services due to some factors such as: the declining level of population income and increasing numbers of displacement in comparison to low medicine supply.

Challenges

- Some Partners who share the same area of intervention have low coordination efforts in terms of granting incentives to workers.
- Failure to assist with some donors to contribute to further integration of services in areas in which we work, although we are committed to sharing reports and fulfilling requirements on an ongoing basis.

Thank you..
